DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William J. Tucker (Reg. # 41,356) on 08/25/2011.

The application has been amended as follows:

2. Claims 69-75 are canceled.

Allowable Subject Matter

3. Claims 33-68 are allowed.

The following is an examiner's statement of reasons for allowance: claims 33, 52 and 60, in combination with other limitations of the claims, the prior art made of record and relied upon by the Examiner fails to teach or specifically suggest a network, method and apparatus for "a relay operative to receiving a digital communication from a first node; compute a plurality of reliability values for a plurality of symbols in the received digital communication, where each reliability value indicates how likely the corresponding symbol is a binary 0 or a binary 1; and transmit a digital communication which has a plurality of symbols that are same as the plurality of symbols in the

Art Unit: 2617

received digital communication but also has the computed reliability values embedded therein to said second node”.

3. And regarding claim 65, the prior art made of record and relied upon by the Examiner fails to teach or specifically suggest a wireless relay based network, wherein each relay station receives a digital communication from a first node; computes and embeds a plurality of reliability values for a plurality of symbols; and transmits it to the second node, in addition, when one relay station knows a channel response of a link between the relay station and the second node, the relay station is able to construct the transmitted signal which is coherently combined at said second node with a similar transmitted digital communication received from another relay station.

3. Claims 34-51 and 66 depend on independent claim 33; claims 53-59 and 67 depend on independent claim 52; and claims 61-64 and 68 depend on independent claim 60. Therefore, by virtue of the dependencies of these claims to an allowed base claim, these claims are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
